SIOUX POST PROFITS

Again Fail to Meet the

Occasion.

Tuesday was dividend day in Provo

for Tintic mining companies, and the

Colorado and Sioux companies both 'came through'', in the language of the

failed to post the usual amount as ex

per share, payable on Aug. 20, to stock

Boston Copper Market.

BOSTON COPPER RANGE.

Sales, H. | L. Clse

YOSEMITE COMPANY WESTERN NEVADA IS HAS BEEN FORMED

Strong Local Interests Have Merged Rich Ground in Bingham Camp.

MASCOTT TUNNEL TO

operating properties. The Yosemite ground is said to have produced over a million dellars, and the properties in the cluded within the lines of the new organization are in shape for early and active ore production.

As the Bingham Mines company has a large interest in the old Yosemite property, hence in the new organization it is the intention to send a branch immel from the Mascott tunnel into the Yosemite territory, the tunnel now being wihin a few hundred feet of the intended point. The Bingham Mines company at the present time has some fine ore bodies developed in the Brook-lyn-Yosemite veins in that portion of its possessions close to the Yosemite Gre lines, therefore there is every reason to expect that several splendid bodies of ore will be developed by the extension of this tunnel.

By some peculiar provision of nature, an imprevious dam for water is he. For

to expect that several splendid bodies of ore will be developed by the extension of this tunnel.

By some peculiar provision of nature, an impervious dam for water is between two groups thus brought together under the Yosemite name, and the known ore bodies of the Yosemite property could not be developed on account of the excessive pumping that has been necessary, the water making its appearance at about the 500 level. The extension of the Mascott tunnel will develop the resources from the beginning at a depth of 1500 feet on the dip of the veins, giving over 800 feet of virgin ground for stopping purposes, and at the same time it will effectually drain the newly organized company's territory. Everyone knowing the mineralization of the Yosemite properties, and the merits of the adjoining ground belonging to the United States and the Bingham Mines company will be a highly profitable producer in a short time.

Up to the present time the eastern officials of the Yosemite company had not been named, but out of the seven directors. Salt Lake City will have two in W. Mont. Ferry and Ernest Bamberger. There are a number of prominent local mine investors interested in the organization, and without exception they feel that within a short time. Bingham will have another liberal producer in the Yosemite. Perhaps the most striking item in the organization of this new company is the neglect that this known rich mining ground has suffered during the past few years. But it is understood that it was only recently complicated and conflicting interests were sufficiently untangled to allow the present step of organization.

NEW TARIFF SCHEDULE

ON ALL THE METALS

NEW TARIFF SCHEDULE ON ALL THE METALS

The new tariff bill has not become law at the present writing, August 4. A final vote on its passage in the senate was to be taken August 5. It does not appear at all probable that any of the rates agreed on in the conference committee between the house and senate will be changed, and we give, therefore, some of the important duties as fixed by the bill:

	Lib.W.	T SCLIII	NEW YORK CURB		
Lead, per lb. Zinc, per lb. Zinc sneets, per lb. Zinc in ore, per lb. Aluminum, per lb. Antimony, per lb. Antimony in ore, per lb. Nickel and oxide IRON AND STEEL. Pres'nt New

In the chemical class areance is on the free list. Boraxis reduced from 5c. to 2c per pound. In colors, white lead is reduced from 3ic. to 3c. per pound; if it cell, from 2ic. to 2ic. In miscellaneou minerals, mica is reduced by 1c. pe pound, and gypsum from 50c. to 30c. pe

The bill is so long, and some of its pro-visions so complex, that a careful anvisions so complex, that a careful analysis is needed before reaching its full meaning. With the exception of zinc, the changes on metals are not important.—Engineering and Mining Journal.

PRINCE COMPANY SELLS SOME SPLENDID ORES

On Monday the management of the Prince Consolidated company of Ploche received the settlements for two cars of ore, which shipment netted \$77 per ton. This rock came from the winze workings between the 500 and 400-foot levels of the property and is the result of development work purely, no stoping being done by the company at all. Two cars of similar ore are en route to the local market and should be received any day now. These shipments illustrate what Ploche could do with a market a little closer to the mines than that at present available.

ACOMA-CALIENTE-PIOCHE. Excursion, round trip, Acoma, \$11.40; Caliente, \$12.65, and Pioche, \$14.65, Salt Lake Route. Return limit 10 days.

G. A. R. SPECIAL. We will send The Salt Lake Tribune to any part of the U. S., Canada or Mexico, containing all the news of the 43d national G. A. R. convention, 8 days for 25c.

TYPICAL OF MASON

Rich Faces in Good Enough **Bodies Help the Average** of Mine.

On Tuesday morning, General Manager Maurice M. Johnson, of the West ern Nevada Copper company, received REACH INTO PROPERTY

Will Develop Ores and Drain the Mine Inside of Short Time.

Lacking a few details which must be supplied by the eastern end of the proposition, the organization of the Yosemite Mines company has been perfected by prominent western and eastern interests. The Yosemite Mines company is capitalized for \$1,000,000, divided into 1,000,000 shares of which are retained in the treasury.

The company owns the well known Yosemite group of six patented claims; the Cluster group of six patented claims; the Cluster group of five patented claims, and the Mississippi claim adjoining the two groups montioned, all being located in one of the richest and most productive portions of the camp of Bingham. On the southwest side are what are known as the Brooklyn veins, while on the northwest side are what are known as the Brooklyn veins, while on the northwest side are what are showing properties. The Yosemite ground is said to have produced over a million dollars, and the history of the operating properties. The Yosemite ground is said to have produced over a million dollars, and the properties in cluded within the lines of the new or carnivation are a slean, for easily and the following, received the mine superintendent. It was stated in this report that the best showing had in the mine at present is on the 400 foot level, although the 300 and 500 level is sheing main the mine at present is on the 400 foot level, which is such being good as usual. On the 400, says the report, the ore is being main the lower, the ore is being main the wild good as usual. On the 400, says the report, the ore is being main the properties in the eastern end of the properties in claim and included within the lines of the new or carnivation are a six and the first properties in claim and included within the lines of the new or carnivation are a six and the first properties in claim of the properties i REACH INTO PROPERTY the regular monthly report from the

PLENTY OF ORES IN THESE MINES

United States Company Owns Mines That Can Provide Copper Rock.

NEED NOT CORRAL ANY CUSTOM BUSINESS

street, but the Iron Blossom directors Opening of Properties Will Propected. The Colorado posted eight cents vide Work for Many More holders of record on the 16th. The Miners.

Sioux will puy seven cents a share on Aug. 20, to stockholders of record on Aug. 15. It is thought that the Iron Blossom directors were afraid that sufficient money would not be forthcoming There has been some speculation in scal circles, since Judge Marshall modified the injunction decree allowing the in time from the ore shipments to the smelters to meet pay day for stock United States Smelting, Refining and holders, but in the absence of official Mining company to operate its copper word no one knows the financial confurnaces under certain restrictions, as dition of the company.

That there was some interesting div That there was some interesting dividend news brewing was apparent all morning in local brokerage circles, and Iron Blossom developed a weakness by virtue of non-dividend paying reports. The stock, however, developed a strength also during the morning that was unlooked for, and before the noon hour arrived considerably over twenty thous and shares had exchanged hands. This gave rise to several interesting rumors, the most persistent being that those on the inside are expecting some news soon that is not comprehended within the knowledge of the ordinary mortal. News will be awaited with much interest, and in the meantime traders not on the inside will be gambling in the dark as usual. to where the management will secure

that there are at least forty stopes in the mine from which a practically lim-itless tonnage of each sort of rock can

the company is the own copper mines which can any tonnage of copper sultromates that a large duily ton hage of silver and lead ores is now being drawn for the concentrating plant at Bingham Junction,

It is likely that the earnings of the United States company will show an immense advance on the completion of the present copper plans. Utah, therefore, will become more of a factor in the affairs of the company, and mines or portions of mines of this organization which have been idle in whole or in part for the past two years will rosume operations full blast again. CHIEF CON. STRIKES

Visitors from Tintic speak in the highest terms of the developments being gained by the management of the Chief Consolidated company. One well-known Tintic citizen on Tuesday stated that the company has opened some fine ore on the 1460-foot level, the rock carrying much better silver and gold values than have existed on any of the upper levels, while there is a bit of copper associated with the ore.

"I deem these developments such as could have been expected, for they are typical of the camp. Typical in that with depth the resources are found to extend with strength, and with even better metallic contents, than those found above. The Chief Consolidated is pegging away quietly, not saying much, but doing a great deal, and some of these mornings Utah will wake up with the sudden realization that the Chief is one of the big mines of the state."

Boston Consolidated company, was in the city yesterday from Bingham.

George H. Dern, general manager of the Consolidated Mercur Gold Mines company, is in the city from the Mercur district.

General Manager Colin McIntosh of the Dhio Copper company, spent Tuesday at the property in Bingham.

Visitors from Bingham say that the work of excavating for the mill extension by the Utah Apex Mining company is progressing fast.

M. C. Godbe left last night for the foot shaft to be driven as soon as possible on the property. Mr. Godbe, while in the camp, will let the contract for the foot shaft to be driven as soon as possible on the property of the Centennial-plocked company with the constant of the Consolidated Mercur Gold Mines company, is in the city from the Mercur district.

CHANGES AT SMELTER

UF UNITED STATES CO.

11-16

S. C. Hazelton has been made superintendent of the smelting plant of the funited States Smelting, Refming and Mining company of Bingham Junction. Mr.
Hazelton succeeds the late Robert Rhodes, and at one time was assistant to Mr.
Pholos at he local plant. When the suits of the farmers closed down the copper smelter of this company Mr. Hazelton was sent to Peru to work in smelters there in which his company is allowed the last the company is allowed the privilege again of treating copper ores the has been brought back to Utah. G.
W. Metcalf, who has been acting superintendent of the smelter since the death of Mr. Rhodes, has been assigned to special metallurgical work with the various smelting plants owned by the United States company.

OHIO CORDER COVER.

OHIO COPPER COMPANY HAS DAYLIGHT AHEAD

The management of the Ohio Copper company has been delayed in mill construction by the lack of steel for the tresle work between the mine and mill. Word has been received now to the effect that this material soon will be received in Bangham, and General Manager Colin McIntosh is of the opinion that he will have one-fourth of the new concentrating plant in readiness for operation before the middle of September. It will take a very short time to install this trestle steel when the men employed on construction once can get their hands on the same,

JURY STILL OUT IN BIG MONTANA CASE

HELENA Mont. Aug. 10.—The jury in the million-dollar suit of the St. Louis Mining and Milling company against the Montana Mining company, limited, is now deliberating on its verdict. More than seven weeks were required to adduce the evidence, give the lawyers an opportunity to make their addresses and permit the court to read its instructions, which were quite lengthy and which were delivered today. A verdict is not anticipated until tomorrow at least.

OLD PRINCE MINE HAS ITS CAPITAL INCREASED

Company Will Enlarge its Facilities and Operate on Larger Scale.

The company which controls the Prince of Wales mine, which is situated at Alta, has increased the number of shares from 10,000 to 30,000. The company is now shipping about forty tons of ore each month from the famous old working. The ore is brought down from the mine in freight wagons, and comes via the Big Cottonwood canyon route. At Murray it is taken to the Taylor & Brunton ore sampling mill, where it goes through the various processes. It is said that this is a very high grade of ore and equals any that comes from the mines at Alta. It is the intention of the company to enlarge its facilities so that it may be able to operate upon a larger scale very shortly.

Recently the company has added six more claims to its list, and expects to cut the old mine about 800 feet deeper. The following are the names of the officers and directors of the old Prince: Fred L. Schrott, president; A. F. Elgpany is now shipping about forty tone

Fred L. Schrott, president; A. F. Elg gren, vice president; E. A. Ulrey, sec-retary and treasurer. The officers, with L. P. Hill and Albert Elggren consti-tute the board of directors.
